Questions to Coordinate Between Doctors

When a decision involves more than one specialty. This tool only keeps the question, the answer, and who owns the next step — no ready-made medical decision from this site.

Example only: Orthopedics recommendation ↔ Nephrology concern → Shared decision needed.

Doctor / specialty	Recommendation	Concern from another specialty	Still unresolved?	Who coordinates?	Next action

Summary of what needs coordination

Educational and organizational only. Does not diagnose, set doses, or replace a clinician. What you notice at home is not the same as what is in the medical record, and not the same as what the doctor decides.
