

<https://ca2deficiency.duckdns.org/> · Educational organizing tool — not a diagnosis or treatment plan

Labs and Imaging Log

An organizing log. No imaging is a mandatory routine for every patient.

Labs

Type	Last date	Summary	Follow-up?	Next date
Blood gas				
Electrolytes				
Blood minerals				
Urine testing				
Other physician-requested labs				

Imaging

Type	Reason	Last date	Summary	Follow-up?	Next
Kidney					
Bone					
Brain					
Other imaging ordered by the doctor					

Scheduled follow-up versus imaging for a new symptom

Scheduled follow-up test or scan (as planned by the doctor)

Imaging because of a new symptom (if the team requests it)

Things you may want to mention to the doctor (no automatic test link)

- ☐ Change in urine amount ☐ Fall/injury ☐ Abdominal pain ☐ Chronic/recurrent headache ☐ Abdominal distension
- ☐ Change in vision/hearing/other senses

Educational and organizational only. Does not diagnose, set doses, or replace a clinician. What you notice at home is not the same as what is in the medical record, and not the same as what the doctor decides.
