Medication Acceptance Notes

For chronic medicines. Information for a professional — not behavioral treatment advice.

What have you noticed at home?

- ☐ Taste rejection ☐ Nausea ☐ Abdominal discomfort ☐ Crying ☐ Bargaining ☐ Mouth closure/refusal ☐ Spitting
- ☐ Delayed dose ☐ Missed dose ☐ Partial dose ☐ Unknown amount swallowed

How much was actually swallowed?

- ☐ All ☐ Most ☐ Some ☐ Most was spat out ☐ Unknown

How is the medicine currently given?

- ☐ As is (not mixed) ☐ Mixed with something else ☐ Another method

Do not mix medicine with any food or drink unless a physician or pharmacist confirms that the method is appropriate.

Other method if used

Family/psychological notes (for a professional)

- ☐ Has a reward become an expected condition? ☐ Do medication negotiations cause tension?
- ☐ Does refusal delay the dose? ☐ Are parents exhausted by the negotiation cycle?

Notes

Educational and organizational only. Does not diagnose, set doses, or replace a clinician. What you notice at home is not the same as what is in the medical record, and not the same as what the doctor decides.
