

<https://ca2deficiency.duckdns.org/> · Educational organizing tool — not a diagnosis or treatment plan

## Summary for a New Doctor

Purpose: help a new clinician understand the condition in about one minute. Fill documented facts only.

CA II diagnosis

Type of renal tubular acidosis (RTA)

Genetic result if available

Usual documented pH

HCO<sub>3</sub>

K

Current medications and prescribed doses

Fracture history

Kidney follow-up

Major imaging / history

Current problems

Treating specialties

Treating hospital

Medical report attached?

☐ Yes ☐ No

Report date

**Information often missing from a report:** baseline values · RTA type · current prescribed dose.

Educational and organizational only. Does not diagnose, set doses, or replace a clinician. What you notice at home is not the same as what is in the medical record, and not the same as what the doctor decides.
